

A. Candidate-gene localization

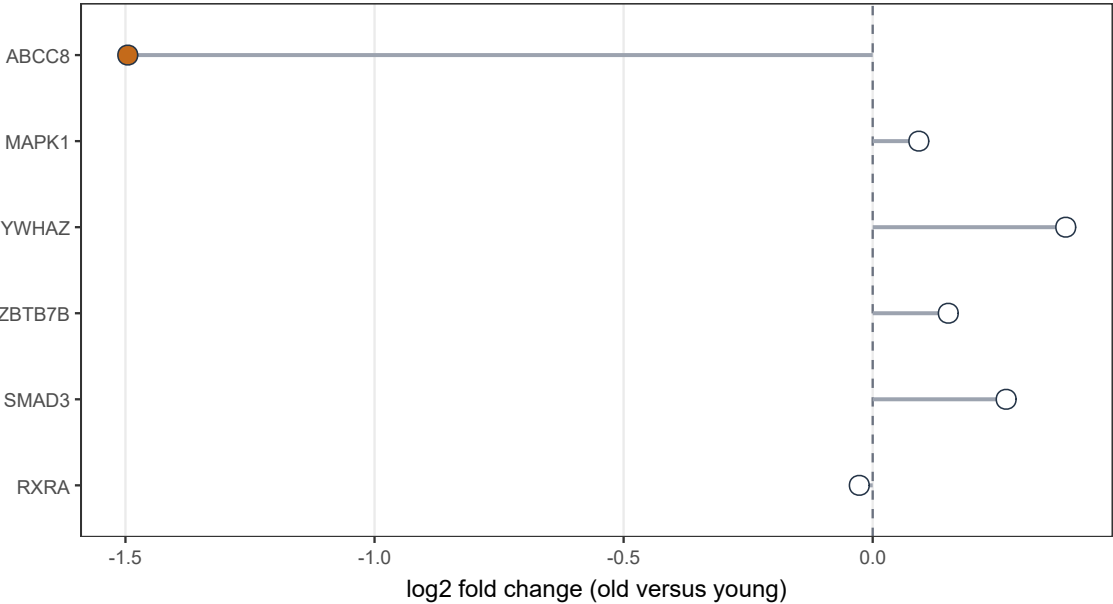

GSE167186; fill represents nuclei with detected expression (%)

B. Fast-fiber pseudobulk expression

Old versus young donors; filled point indicates global candidate FDR < 0.05

FDR support ○ Not FDR-supported ● FDR < 0.05

C. Targeted skeletal-muscle sQTL-MR

Wald-ratio estimates for the prespecified gene-trait pairs

FDR support ○ Not FDR-supported ● FDR < 0.05
